The Jersey Numbers will synchronize from the Registration Teams as long as their isn't already information on the Gaming League Application. This synchronization process is not "destructive", meaning the synchronization will not write-over existing information.

In order to make an immediate update to jersey numbers, the Coach will need to click on edit for the tournament application, click on the Player Roster for the Gaming Application and then click on the "Edit Player Team Info" button to make an update for the Game Day Roster.

Here are the steps to make this update:

1. Coach Logs In to "My Account"
2. Coach Clicks on "Edit" next to the Application under <u>Tournament Applications / Game Scoring:</u>
